

REMARKS

The above amendment to the specification is being submitted to correct the family identification of this application with respect to its predecessor applications, some of which have already been patented. The original reference to the related applications that was filed with the preliminary amendment was only partly right, and is now corrected by this amendment.

It is also respectfully submitted that the claim for priority based upon European patent application 97 11 2357.6 be acknowledged.

Date: March 31, 2005

Respectfully submitted,

Felix J. D'Ambrosio
